

## Supply Chain Management

Supply Chain Management is popularly known as SCM or sometimes referred to as Demand Chain Management or DCM.

### What is Supply Chain Management?

A supply chain is the link between raw materials and the end-user creating a flow of goods, information, and funds. It not only includes the company, but also its suppliers, buyers, vendors, customers, and others with whom it interacts.

### Why obtain a Supply Chain Management Solution?

There are four dimensions to an integrated Supply Chain Management Solution:

1. Integration of purchasing, manufacturing, transportation and warehousing activities.
2. Integration of above activities across vendors, facilities, and markets.
3. Integration of these activities over strategic, tactical and operational planning.
4. Enterprise wide integration.

### Benefits of Supply Chain Management Solution

Companies can forecast

- production planning
- flow and process management
- inventory management
- customer delivery
- after-sales support and service
- shipment tracking systems
