

## Workforce Automation

Smart business owners know their most valuable asset is their workforce. Service companies are completely dependent on their employees to create revenue and exceed customer expectations. As the marketplace widens and market share dwindles, an automated and informed workforce becomes a necessity not only for success, but for survival.

While it may seem a daunting task to automate your entire workforce, there is one formula you can focus on to ensure success:

Optimized Productivity + Maximized Revenue + Customer Satisfaction = PROFIT

All three components are central to your workforce and Adjutant's workforce automation solution.

Adjutant utilizes scheduling, mobile-web, work-flow automation, performance tracking, project management, and auto-notification technologies to create an advanced workforce automation tool. Combined with web-enabled CRM and real-time location tracking, Adjutant delivers an unrivaled package for today's best companies.
